Integration Studio

Integration Studio is a desktop tool that allows you to create and manage your extensions.

The next screenshot presents the workspace for this tool:

The workspace is divided into the following areas:

**Toolbar**
Where you can create new extensions, verify and publish an extension, connect to the Platform Server, etc.
**Multi-tree Navigator**
Where you can add and select your Actions, Structures and Entities, in the Extension tree; add and select your Resources, in the Resources tree.

**Status bar**
Contains information about the extension, like the folder where the XIF (Extension and Integration Framework) is being saved.

**Multi-tab editors**
Contains all the elements (extension, actions, structures, entities and resources) that you have selected in the Multi-tree Navigator.

**Specific Editor**
Where you can edit the extension and its elements: actions, structures, entities, or resources.

**Server Info**
Where you can find information on which Platform Server you are connected to and which user has established this connection.
